Pool Service

January 2023

Chlorine Times

Best Wishes for a Happy Holiday

In this issue:

- Holiday Service
- Stain Season
- Reminders
- Repairs

NOTICES

Holiday Hours: We will be closed the week of Christmas. Our service technicians use this time to spend with their families. Extra care is taken prior to these days to adjust your pool's chemistry for our time away. The specific non service dates are December 26 through the 30th.

Drain and Clean Stain Removal: Most drain and clean treatments produce superior results and remove years of mineral buildup on your surface. Please contact our office to schedule a time for one of our technicians to look at your stains in your pool and to quote for removal.

REMINDERS

Skimmer and Pump Baskets: Baskets that are broken or have large holes in them should be replaced. Allowing larger or excess debris into your filter or pump can lead to costly repairs and equipment failure. To have your baskets replaced please let our technicians know or call the office.

During the week that our office is closed, it is important to empty skimmers baskets to allow the proper circulation in your pool.

Save Energy, Less Work: Avoid tired sand, old cartridge or damaged filters. Let your equipment perform the work they were designed to do. Avoid the cost of prolonged filtration cycles and more frequent cleaning routines by maintaining your filtration equipment for peak performance. If your sand in your filter is more than 5 years old, consider upgrading to a cartridge system. Replace cartridges annually and perform DE grid maintenance annually. For assistance in these matters please contact our repair department at 636-0903.

Filter Backwashing: This service maintenance is required once per month or when filter pressure increases 10-12 pounds above normal. Over cleaning results in excessive water loss and chemical dilution, which could induce a chemical failure. So manage your backwashing wisely. Monitor your filter pressure gauge regularly. It is typically located on the cover of your filter.
